REDUCE YOUR RISK
The YMCA’s Diabetes Prevention Program helps overweight adults at risk for type 2 diabetes reduce their risk for developing the disease by taking steps that will improve their overall health and well-being. Research by the National Institute of Health has shown that programs like the YMCA’s Diabetes Prevention Program can reduce the number of new cases of type 2 diabetes by 58%, and 71% in adults over the age of 60.

What is the YMCA’s Diabetes Prevention Program?
• 1-year program, 16 weekly sessions followed by monthly sessions
• 3-month YMCA membership for the participant and their family
• Small group, supportive environment
• Learn about healthier eating & increasing physical activity to reduce risk
• Classroom based— can be offered in any community setting
• Classes are offered in the four parishes of Plaquemines, Orleans, Jefferson, St. Tammany and other surrounding communities.

What are the goals?
• Reduce body weight by 7%
• Increase physical activity to 150 minutes of moderate (the equivalent of brisk walking) physical activity per week

"While attending my classes, I’ve realized I wasn’t alone in this struggle"
- Victor, Belle Chasse

"I would have never taken this step and made these changes if it wasn’t for the Y and the support of my coach and class friends”- Art, Belle Chasse
Is the YMCA’s Diabetes Prevention Program right for me?
